

ENVIRONMENTAL AND SUSTAINABILITY PURCHASING POLICY

At IGNITION, we are dedicated to reducing our environmental impact and we recognise that successful implementation of an effective environmental and sustainability management system depends on our principles being extended throughout the supply chain and integrated into the procurement process.

Wherever possible we will minimise the demand for resources and minimise the negative impacts of products, services and of the supply chain itself by:

- Purchasing recycled or reusable products
- Promoting the purchase of locally produced and sourced products and services
- Purchasing fairtrade and organic consumables
- Avoiding the purchase of products containing ozone-depleting substances such as CFCs and HCFCs; products containing toxic substances and products with excessive packaging or packaging which cannot be recycled
- Avoiding the purchase of single use plastics
- Purchasing FSC timber where possible
- Purchasing electrical appliances which are rated A for energy/water efficiency
- Encouraging the use of the circular economy
- Procuring sustainable suppliers with environmental and ethical credentials or objectives
- Communicating our environmental principles and objectives to suppliers to help them maintain their sustainable principles
- Procuring diverse suppliers, who reflect the diverse clients we serve
- Ensuring that fair contract terms with suppliers, employees, clients and contractors are applied and respected.
- Giving consideration to obtaining energy supplies through renewable sources or environmentally friendly suppliers
- Aiming to become net carbon neutral by monitoring, reducing and offsetting our scope 1, 2 and 3 emissions
- Complying with all environmental and health and safety regulations

This policy will be reviewed and updated annually by senior management.
